“Simply state the facts of your case as you see them. Don’t accuse anyone of disinformation, just put out your story. Don’t react. Act. There are lots of voices. The most effective thing you can do is repeat your message. Don’t dilute it with other issues even if they are related, hammer the basic idea. If you accuse someone of lying or fabricating the issue is shifted off the main point and onto a side discussion of character. You don’t want to punish the disseminators. You want to educate, to convince others, to create allies so that there is a chorus not just a single a cappella voice.” Mike Millan. Civil Engineer, Teacher, Carpenter, Woodworker.
